INTERESTS AND HOBBIES

I really like Japanese culture.
I also really enjoy visiting new places and discovering new things.
I also love swimming as well as walking.

PROFESSIONAL EXPERIENCE

Didask - Software Engineer

Software Engineer (2025 - Present)

- Developed new features (e.g., voice training) to enhance product attractiveness and user engagement.
- Contributed to the complete redesign of the AI Assistant for learners.

Epitech - Teaching assistant

Technical Mentor (2024 -2025)

I supervise and pass on skills to 1st, 2nd, and 3rd-year students. This work requires both technical and pedagogical skills and has allowed me to grow significantly.

Numalis - Software Developer

Developer Python / Web (April 2023 - August 2023)

Worked on a benchmark in Python for the networks supported by the Numalis tool. Development on the front-end of the application in Angular. Continuous integration and unit testing.

Fruition Science - Software Developer

FullStack Developer (July 2021 -December 2021)

Maintenance work on their various platforms using different technologies/frameworks. Development of a solution to facilitate the work of field agents with a Progressive Web App (PWA) in Angular.

FORMATION

EPITECH | 2020 - 2025

Software Engineering Expert - RNCP Level 7

Epitech is a programming school that uses project-based learning and aims for excellence, autonomy, and creativity in its students.

Chung ang university | 2023 - 2024

Seoul/South Korea 🇰🇷

Exchange studies as part of my 4th year at Epitech and obtaining a certificate of completion

PERSONAL PROJECT

EasyConcertKorea

During my 4th year abroad, there was intense competition for concert tickets. So, I created a bot for the different platforms, making it easier to reserve concert tickets.

JapScan-PageSaver

The goal of this project is to facilitate manga reading by saving pages and providing information about the release of new chapters.
